About Learn Equity

Till now, Stock market is projected as a field of rich people only. However, the reason behind formulating stock market was the fact that corporate can raise money through commoners. However, commoners around the globe are yet to get the real benefit of stock market.

In a country like India, stock is either projected as a way to gamble or a thing which is very complex to understand. And major reason behind this gap is the poor infrastructure which is supporting this market. This is a knowledge industry, but we hardly find good knowledgeable people serving this industry.

LearnEquity is working to fill the gap of Equity Investments through Education and Awareness programs by:-

- ★ Educating both Market Professionals who want to make a career in
- ★ Equity Investment & Advisory services
- ★ Educating Investors on Safe Investment practices and helping them plan
